ABSTRACTED-PUB-NO: DD 217989A

**BASIC-ABSTRACT:** 

Prodn. of a pharmaceutical compsn. in the form of a solvent contg. film comprises immobilising a super-satd, soln, of active ingredient (I) in the film and controlling the release of (I) by varying one or more of (1) the proportion of solvent; (2) its dielectric constant; (3) the thermodynamic activity of (I) and (4) the no. of layers in the film.

Pref. the film contains 0.01-50, esp. 0.02-0.5, wt% solvent of dielectric constant 5-80, pref. 70-80, and may also include auxiliaries such as alcohols, oolyols, polymeric acids, amines, amino acids or ammonium cpds.

ADVANTAGE - The compsn. provides sustained release of (I). (t it simple and inexpensive to prepare and provides reproducible release rates which are independent of external influences and can be varied over a wide range.
